MADE in ITALY WHY use a PAINT FILTER?

A **PAINT FILTER** is needed to *filter already
 diluted paint.*

When you *close* a **paint bucket** you have
 just finished using, paint along the edges and
 under the lid tends to dry in a few hours, so
 much that, once you *open it again*, dried
 paint might fall into the diluted paint. This way
 it could end up in the paint roller, brush and
 on **the painted wall.**

This is why it is *important* to have a
 convenient and handy filter to **filter wall
 paint.**

HOW TO FILTER WALL PAINT?

The **PAINT FILTER**, *easy and practical to
 use*, allows to save time avoiding resorting to
 improvised filtering techniques, for example
 the use of pantyhose/women socks, that
 require more than one person to be carried
 out. It will be enough to position the filter the
 filter on the **paint bucket** and pour the **paint
 to be filtered** inside the bucket.

PERFECT FINAL FILTERING.

**RAPID, HANDY AND PRACTICAL
 TO USE.**

ONLY ONE PERSON NEEDED.

EASILY WASHABLE.

**ADAPTABLE TO BOTH ROUND
 AND OVAL BUCKETS.**

INFINITE PRODUCT'S DURATION.

NO MORE DIRTY HANDS!

**STOP USING
 PANTYHOSE/WOMEN SOCKS!**

MADE to LAST:

Prudent materials' choice and
 attention to details.

Solid object, completely made out of
 quality polypropylene, with the goal
 of lasting in time.
